PRACTICE THE PERFECT PLACEMENT

Rinehart's® Broadhead Buck™ 3-D Target Features Replaceable Vitals Inserts — Helping Bowhunters Practice Their Perfect Shot

The most avid bowhunters know that a perfect arrow placement is vital to ensure organ damage, a clean shot and a recovered buck. That's why leading 3D target manufacturer Rinehart Targets is proud to provide bowhunters with the Rinehart® Broadhead Buck™ Target, specially designed and built with an X-Ray view of critical deer anatomy, providing bowhunters with increased accuracy and efficiency beyond the practice field.

The Rinehart Broadhead Buck Target boasts dual-sided versatility to accommodate any hunter's preferred shooting style. Whether choosing to take aim at the buck's exposed vitals, or testing your knowledge and perfect arrow placement on the buck's natural, lifelike side — this target is ideal for studying detailed anatomy and the effects of the perfect shot from any angle. Affordable replacement vitals insert allows for extended use and practice with both sides of the target.

This anatomically correct, life-sized and life-like buck provides an extremely realistic practice experience. Manufactured using Rinehart's solid "self-healing" foam, this target is ideal for extended practice sessions with field points, broadheads and expandables. Rinehart's exclusive materials and construction techniques allow this target to absorb shot after shot — yet all types of arrows pull out with ease (even a child can pull arrow after arrow out of this target without tearing or damaging the foam). The Rinehart Broadhead Buck Target is also weather proof — resistant to sun, heat and cold — so it's ideal for practice all year long in any climate.

To learn more about the new Rinehart Broadhead Buck Target for big game bowhunters — or Rinehart's full line of premium quality 3D targets for bowhunters and competitive archers — contact Rinehart at 1809 Beloit Avenue, Janesville, WI 53546 • Telephone: (608) 757-8153 • Or visit www.rinehart3-D.com.
