NEW ACME® DELUXE KASTMASTER® 3-PAK — A DEADLY TRIO FOR TEMPTING TROUT AND PANFISH

Three 1/8-oz. Kastmaster Spoons in Fish-Catching Colors Selected by the Experts at Acme Tackle

Acme® Tackle Company — the masters of metal fishing lures for more than fifty years — is offering anglers a new “triple threat” for catching trout, panfish and other freshwater gamefish on light tackle.

Acme’s new Deluxe Kastmaster® 3-Pak combines three of the company’s famous Kastmaster lures — the original slab-sided spoon designed to cast like a bullet and attract fish with wild action on the retrieve or troll. And because of this lure’s perfect balance, it can be fished at practically any speed without line twist.

The 1/8-oz. Kastmaster spoons in this new Acme Deluxe 3-Pak have been selected for their proven effectiveness on trout, panfish and other popular light-tackle freshwater species. Each features a quality painted finish on one side with Acme’s jewel-quality chrome plating on the other. Each of these Kastmasters draws predators in with a combination of color and flash, allowing anglers to “match the hatch” and catch fish under a range of water, light and forage conditions.

Each new Acme Deluxe Kastmaster 3-Pak contains the following color combinations: Rainbow Trout, Candy and Fire Tiger. Rainbow Trout is ideal for lakes or streams where trophy fish feed on trout fry. Candy (white with a fluorescent red stripe and multi-colored spots) is a proven trout and kokanee salmon killer on the cast or troll. Acme’s brightly colored Fire Tiger Kastmaster is very effective in low visibility or stained waters, and is also a great choice for targeting bluegill, crappie and small bass.

Expert lure anglers know that there is no wrong way to fish a Kastmaster. You can let it sink and use a slow, stop-and-go retrieve for lethargic deep water fish, retrieve it quickly just under the surface for actively feeding fish, troll it on a flatline or downrigger troll for suspended trout, or vertically jig it around structure or underneath bait schools. The 1/8-oz. Kastmaster is also a deadly lure when fishing through the ice for trout and panfish.

Every Acme Kastmaster is made with quality stainless steel split rings and needle-sharp treble hooks that keep fish on the line. The lures in Acme’s Deluxe Kastmaster 3-Pak are built to keep fishing — and catching — season after season.
