SwiftShield™ is a Product Which is Going to Save Lives

We're all parents here, with kids of all ages and there is perhaps no bigger fear in the mind of a parent, than when your children are out of your supervision.

Nearly every day in this country – that's exactly what happens when our students go off to school. We, and all parents need and deserve to have a solid and confident expectation that not only are kids being educated, but also safe in their classrooms. While politicians, the media and a frustrated public argue, talk, name-call and try to work through long-term solutions to the very real problem of mass-violence at schools, SwiftShield™ has a real solution now. It saves lives and assures peace of mind.

SwiftShield is a group of people who have developed a real solution to protecting and shielding our kids from a potential violent attack when they, along with teachers and their fellow student are in class. As we have seen, classrooms may find themselves vulnerable in the event of an actual emergency – with an unsecured door being the only thing standing between our children and disaster.

SwiftShield is a brilliant, simple and inexpensive solution to ensuring peace of mind to parents, educators and school administrators that something pro-active and effective is being implemented right now to protect our children. SwiftShield gives school security and law enforcement additional time to do the job they are highly trained to do; it gives teachers added freedom to confidently assist kids as only they can in the event of an emergency.

In those critical seconds and minutes before help arrives, SwiftShield is the ultimate first-responder. SwiftShield is a free-standing device, yet quickly locks down an entry point and can withstand thousands of pounds of force. There is nothing like SwiftShield. It's made in America and can be installed by almost anyone fast and easy – in a matter of seconds – and requires absolutely no structural modification.

Swiftshield is far more than a lock which secures a door, or just protection against an assault, it's also:

- a deterrent against violence, instantly adding a critical layer of crime prevention.
- a comfort to parents, providing peace of mind when children are out of their direct supervision.
- an additional layer of security to provide teachers, law enforcement and security professionals with extra critical time - which can mean everything in a crisis.
