## **PERSONAL TOOL TETHERS ARE A MUST HAVE ACCESSORY FOR TOOL SAFETY AND SECURITY WHEN WORKING AT GREAT HEIGHTS**

### **Rugged, Low-Profile Coil System Provides Added Strength and Durability For Tools**

Working in extremely high and severe environments means facing challenging conditions every step of the way. The Gear Keeper Retractable Industrial Tool Lanyard™ is engineered specifically to provide reliable, versatile access to the gear you need at your fingertips when on the job at great heights, from smaller gear such as wrenches, hammers and pliers, to everything in between. Innovative features of this handy device include a tough Nylon/Spectra line built for high strength and durability as well as a strong stainless steel coil spring mechanism housed inside stainless steel hardware — providing reliable performance for years of rugged abuse on the job.

The unit is available in two models built specifically to protect a variety of tool weights from a full-range drop. The RT4 model is designed to handle tools up to 16oz. and provide users with minimum retraction force (3oz.) while allowing the tool to extend a full 36". This feature allows professionals to have their tools securely attached to them without inhibiting full usage. The RT3 model is ideal for slightly heavier small tools as it can grasp onto tools weighing up to an astounding 32oz., and it provides 12 oz. of retraction force while reaching out to a lengthy 42".

Entanglement issues are a thing of the past since the Gear Keeper Retractable Industrial Tool Lanyard has no dangling strings hanging when multiple tethers are used. Plus, tools can be interchanged in a snap with the lanyard's disconnectable end. The lanyard features a new Clamp-on, dual-axis rotating belt clip that provides 360-degrees of rotation mobility and use of the tool, and can either attach onto a belt or a fall protection harness for increased security. For those who need to hook their tools onto a D-Ring, the unit also comes complete with a snap-clip mounting option.

Even with all these features and heavy-duty construction, the new Gear Keeper Retractable Industrial Tool Lanyard is lightweight and comfortable enough to wear on any job, anytime.

For more information about the new Gear Keeper Retractable Industrial Tool Lanyard contact Hammerhead Industries, Inc. at 1501 Goodyear Avenue, Ventura, CA 93003
