YOUNGSTOWN® PROMISES SAFETY FIRST WITH THE GENERAL UTILITY LINED WITH KEVLAR® GLOVE Glove Designed From the Inside Out to Protect Hands and Keep Productivity High

Safety was at the forefront for designers at Youngstown Glove Company® when they created the company's General Utility lined with Kevlar® glove. Designed to keep hands safe whether handling sharp or abrasive glass, metal or wood, these gloves provide ultimate protection all while giving workers the dexterity to get the job done effectively and efficiently.

Part of the company's Cut-Resistant Series, the General Utility lined with Kevlar® glove is the world's first Dupont™ Kevlar-lined performance work glove built for all-purpose use and specifically designed to withstand abrasions and cuts. Kevlar® – the innovative lightweight, flexible and strong fiber technology used for SWAT team paraphernalia and NASA spacecraft – lines the entire glove giving hands the maximum amount of protection. Practically hand armor, the gloves are sure to become a fast favorite with construction, fire safety rescue and farm professionals among others who work with everything from barbed wire to jagged steel.

Rating an impressive Cut Performance Level 3 for its palm design by ANSI/ISEA 105-2005 standards, the glove offers surprising dexterity enabling a high-level of performance. Durability and grip are ensured with extensive non-slip reinforcement built into the palms and fingers of the glove. A synthetic suede base layer works to keep hands dry from water and oil. Double-stitched bonded nylon thread is used throughout the glove giving it extended life.

Comfort was not left out of the equation when constructing the General Utility lined with Kevlar® glove. The glove features a supportive cuff with an adjustable Velcro® closure guaranteeing a snug and secure fit. Hands also stay comfortable thanks to the directional stretch nylon on the top of the hand, which works to wick away moisture and keep hands cool and dry. A terry cloth thumb is also incorporated into the glove lending the ability to wipe sweat and debris.

The General Utility lined with Kevlar® glove (part # 05-3080-70) is available in sizes small through XX large.

Youngstown Glove Company manufactures the world's most durable performance work gloves. Founded in 2002, the company has been unwavering in their commitment to quality, innovation and customer satisfaction. Offering more than 30 performance work glove styles available in sizes small through XX large, the company strives to exceed the demanding needs of professional workers. Every Youngstown style developed endures
