PUT THE POWER OF INNOVATIVE DESIGN TO WORK FOR YOU WITH THE NEW OUTDOOR PRODUCTS® POWER PACK GLIDE™

The experts at Outdoor Products®, manufacturers of high quality packs and camping accessories since 1972, have thought of everything – especially you, the backpack user – when they created the innovative and ultra-convenient Power Pack Glide.™

This roomy and durable pack, measuring 18”H x 12.5”W x 7.25”D, is the perfect choice for students, business professionals and anyone who appreciates smart design. In fact, the new Outdoor Products Power Pack Glide takes the most challenging of travel and work scenarios in stride, from last-minute gate changes to keeping files and books organized for a full load of classes.

Among the pack’s long list of ingenious design characteristics, perhaps the most outstanding is the internal, removable sleeve that makes digging your laptop out of your bag a thing of the past – an invaluable feature for road warriors who want to speed through airport security checkpoints. This amazing, TSA-compliant laptop track system fits most 15-inch laptop computers and rests within its own compartment that slides in and out along smoothly operating tracks that can be disconnected if needed. Getting through security has never been faster or more secure, because the sleeve – and therefore your laptop – can simply be slid out of the pack and placed on the airport security conveyor, with the mesh window facing up. Once the pack passes through the x-ray, the sleeve slides right back into the new Outdoor Products Powerpack Glide pack and you are on your way – no more unpacking your laptop, separating it from your backpack and placing it in a plastic bin.

In addition to making passing through security faster and easier, the cleverly conceived pocket also makes your laptop accessible and packable in a snap, ideal for putting the finishing touches on a report during a layover, checking e-mail at the local coffee house. For added convenience and security, the laptop compartment features a dual zipper handle that opens and closes in one, quick motion.

Executives on the move, active parents and busy students who want to earn an A in organization will rejoice when they see the new Outdoor Products Power Pack Glide’s main storage compartment, which easily accommodates files, books and bulky gear. Smaller items that can get lost in the shuffle stay within easy reach when tucked into the new Outdoor Products Power Pack Glide’s front, foam-padded and lined organizer pocket. Your flash drive, camera,

media player, computer peripherals, cords, keys, pens and business cards all have their own spot, where they remain protected and secure until called into action.

A padded back panel features a zippered stow pocket for a passport, while a top fleece-lined sunglasses pocket not only protects your shades, but also keeps them handy for quick retrieval.

The new Outdoor Products Power Pack Glide takes comfort to the next level with an anatomic yoke that fits both men and women and offers even more storage options with straps featuring accessory pockets. Negotiating crowded airports or city streets can be a worry-free endeavor, thanks to a secret stow pocket that is inaccessible to outsiders while the pack is in use.

The new Outdoor Products Power Pack Glide is available in both black and legion blue. And like all Outdoor Products' gear, the new Outdoor Products Power Pack Glide has a lifetime guarantee, allowing you to trek and travel with confidence.
