

RIDGELINE® HEAD PROTECTION BY PYRAMEX SAFETY PROVIDES THE SAFETY YOU NEED FROM IMPACT HEAD INJURIES

Comfortable Fit, Ultra Durable Design and Superior Materials Make for Virtually Weightless Protection

Quality head protection is a staple in a number of work environments. Select a brand you can trust – Pyramex Safety Ridgeline® – for expertly designed, high-performing hard hats and bump caps. Find what you need for everything from general all-purpose work use to conductive fieldwork settings. Ridgeline head protection comes in three styles, a variety of finishes and colors including hi-vis options, vented versions and are available with 4 point and 6 point ratchet suspensions for easy adjusting.

Choose from Ridgeline’s three styles of hats – full brim, cap and bump cap. The Ridgeline Full Brim Hard Hat is constructed of ABS material for strong and seemingly weightless protection. The helmet is easy to adjust with ratchet suspension that allows the wearer to modify the fit while wearing the hard hat. A soft, replaceable brow pad and ratchet suspension provides a comfortable fit.

The Ridgeline Cap Style Hard Hat is also made of highly robust ABS material. The low profile design has a low center of gravity for better balance and features a four-position harness allowing you to move the harness forward, backward, up or down for a personalized fit. There is also an easy to grasp knob to adjust the suspension from 6-1/2 to 8 as well as swinging hinge points that allow you to find the most comfortable position on the back of your head. The Ridgeline Cap Style Hard Hat also passes standards for reverse orientation, high temperature (HT) and low temperature (LT). Rear padded suspension and padded fabric and a polyurethane foam sweatband provides all-day comfort. A vented pressure pad keeps your head cool.

Ridgeline Full Brim and Cap Style non-vented head protection meets ANSI Z89.1, Type 1, Class E, G and C. Vented head protection meets ANSI Z89.1, Type 1, Class C. Hi-vis colors have been tested for the “HV” mark. Some options meet Canadian CSA Z94.1 - 2015 (*), Type 1, Class E, G and C standards – SEI third-party certification. Both hats are available in standard colors as well as Hydro Dipped patterns, which provides for a little extra style in your headgear.

The third model, the Ridgeline Bump Cap, is ideal for applications where hard hats are not required but protection from minor bumps and scalp lacerations are needed. Made from a resilient polyethylene material, the Bump Cap is not designed to meet the safety standards for industrial head protection. The Cap is constructed for maximum comfort with a 4-point glide lock suspension, ventilation holes, and padded foam and fabric sweatband.

Custom imprinting is available on all Ridgeline head protection.

Pyramex Safety delivers high quality safety products through its innovative and stylish product lines. The company designs and manufactures a variety of personal protective equipment from eye, head, hand, welding, cooling and hearing protection to Hi-Vis work wear, respirators and ergonomic gear. Founded in 1991, the company has more than 2,000 distributors in over 60 countries and is committed to investing countless hours to research, design and testing to ensure Pyramex products meet the highest industry safety standards.
