YOUNGSTOWN® DELIVERS SUPERIOR LEATHER UTILITY XT™ WORK GLOVE LENDING MORE DEXTERITY AND HIGHER PRODUCTIVITY

New Glove Goes Above and Beyond Standard Bulky Leather Gloves in Both Fit and Safety

Dexterity or protection: it's no longer an either/or choice with the new Leather Utility XT™ glove by Youngstown Glove Company®. Designed in conjunction with linemen from Southern California Edison utility company, the goal when creating this glove was to provide an ergonomic, comfortable and flexible fit all with the safety Youngstown is known for. Created with linemen in mind, the glove is suitable for a variety of tasks for which protection as well as a high level of dexterity is needed from climbing to wiring.

“Most leather work gloves are loose and bulky and we wanted to create a leather glove in a 3-D performance pattern to give that form-fit feel but with leather,” said Max Hackett of Youngstown Glove Company. “The goal was for hands to be safe as well as able to pick up and screw in small objects.”

Every aspect of the new Leather Utility XT™ glove was carefully thought through in order to provide the most durable, flexible and comfortable pair of gloves possible. The glove is constructed with 100 percent high-quality goatskin leather which remains soft and supple, even in wet conditions. The glove is sewn together into an ergonomic, 3-D performance glove pattern allowing for an exceptional level of dexterity and deftness. Precision sewing results in better tactility and nimbleness meaning the wearer will be able to securely and tightly grasp objects.

Safety is pinnacle in the development of all Youngstown's products and the Leather Utility XT™ glove is no exception. The glove features heavy-duty double knuckle protection on the top of the hand, which helps to defend against scrapes and cuts. There is also a 2.5-inch safety cuff built in for wrist protection while climbing.

The Leather Utility XT™ glove is available in sizes small through XX large.

Youngstown Glove Company manufactures the world's most durable performance work gloves. Founded in 2002, the company has been unwavering in their commitment to quality, innovation and customer satisfaction. Offering more than 30 performance work glove styles available in sizes small through XX large, the company strives to exceed the demanding needs of professional workers. Every Youngstown style developed endures extensive testing – both in the laboratory and in the field – prior to being slipped onto customer hands. Thorough

testing, proven patterns, innovative materials and meticulous quality control are all hallmarks of a company with a simple goal: to design the best working gloves you've ever owned.
