Baschieri & Pellagri (B&P) Ammunition was founded in 1885 when Settimio Baschieri, a dedicated hunter and Guido Pellagri, a chemistry graduate, first created a smokeless or "white" gunpowder. At the time, only black powder was used which required great amounts of powder and produced large amounts of smoke. Since then, the company has grown to become a premier, worldwide leader and producer and distributor of powders, Gordon System® cases, plastic wads and cartridges for smooth bore guns. Through a simple but perfected equation of superior materials, uniquely proprietary practices and the finest, most devoted people, the company has continue to innovate and deliver the best products becoming the first choice for hunters and competitive shooters worldwide.
