ALL-PURPOSE AND ABRASION-RESISTANT, THE GENERAL UTILITY PLUS™ GLOVE BY YOUNGSTOWN® OFFERS THE BEST DURABILITY TO PRICE RATIO BAR NONE

If you're looking for the best all-purpose protection for your hands, you need not look further than the General Utility Plus™ glove by Youngstown Glove Company®. The company's number one selling glove, the General Utility Plus glove gives your hands everything they need – from lab and field-tested safety to ergonomically designed-comfort – in order to perform virtually any task from handling lumber to general construction activities. Perhaps most notably, along with proven patterns, innovative materials and a wide variety of carefully designed features, the General Utility Plus glove is available at a remarkably reasonable price (MSRP is \$21.99).

The Youngstown General Utility Plus glove's functionality and durability is founded on thorough and calculated design. Beginning with the palm, the glove's robustness starts with a durable synthetic suede base layer that will not shrink, stretch or harden. Non-slip reinforcement throughout the palm, fingers and thumb give the wearer the tightest grip possible all while providing increased durability. Additional non-slip saddles are put in place to extend durability and grip in critical wear areas.

The palm also incorporates reinforced synthetic suede fingertip protection as well as a terry cloth thumb to easily wipe away sweat and debris. All reinforcement features in the palm are double stitched with nylon thread to ensure the integrity of the glove and keep materials in place even when performing the most rugged of jobs from moving metal beams and pallets to repositioning machinery or handling shipments.

When it comes to the back of the hand again, no details were spared. The Youngstown General Utility Plus glove protects against nicks and scrapes with padded neoprene across the knuckles. Directional stretch nylon works to wick away heat and moisture keeping hands cool and comfortable. A breathable neoprene cuff lends wrist support and additional comfort. Finally, an adjustable Velcro closure guarantees a snug fit, keeping out dirt and debris.

The Youngstown General Utility Plus glove is available in sizes small through XXX large and is machine washable.

Youngstown Glove Company manufactures the world's most durable performance work gloves. Founded in 2002, the company has been unwavering in their commitment to quality, innovation and customer satisfaction. Offering more than 30 performance work glove styles available in sizes small through XXX large, the company
