PRÓIS® HUNTING AND FIELD APPAREL INTRODUCES NEW COMPETITOR SHOOTERS VEST The Perfect Companion For The Professional Shooter — And Those Who Like To Perform Like One

The key to creating high performance gear for competitive shooters is meticulous attention to every detail. Próis® Hunting and Field Apparel recognizes this, which is why the company has put so much thought and technical function into every design element of the new Próis Competitor Shooters Vest™.

If you're competing in any style or type of shooting, you'll need a piece of gear that's made with the same type of precision in which you train for to hit the mark every time. Just like you, this vest is in it to win it. It's constructed of heavy weight cotton/poly canvas and lightweight poly mesh — quality that will stay with you shooting sessions and seasons to come. And, this vest is literally for everyone! It boasts unique bilateral shoulder padding tailored to protect both sides whether you're a left or right dominant shooter. Interior pockets behind the padding allow shooters to insert recoil pads. Front expandable cargo pockets with magnetic closures makes holding and accessing shells a snap. Plus, the rear mesh pouch is great for housing spent hulls, while an embedded zipper releases them with a quick and simple 'pull'.

Of course, the coolest features on the planet mean nothing if it's not a comfortable wear. And what's more comfortable than a piece of gear that's made just for you, the athletic female shooter! The sleek-looking Próis Competitor Shooters Vest is constructed with a feminine cut, so it falls and fits perfectly. Also adding to the comfort and function of this vest are adjustable cam straps and a buckle at the waistline.

Próis knows that high-performance women athletes want choices when it comes to gear, and they get just that with the Próis Competitor Shooters Vest. Simply unzip the vest at the waist and convert it into a Shooters Apron, for another functional option at any shoot. The vest is available in both black and khaki, and will be available summer 2011.
