YOUNGSTOWN® WATERPROOF WINTER XT™ GLOVE ENSURES WARMTH IN EXTREME COLD Specialized Design and Added Thinsulate Make Glove Appropriate for Most Hostile of Conditions

When it's bone-chilling cold reach for the Youngstown® Waterproof Winter XT™ glove which was built to combat punishingly icy conditions. Legions above the vast majority of cold weather gloves, the Youngstown Waterproof Winter XT glove features fundamental design differences and added warmth features to deliver a comfortable fit without compromising dexterity. So, whether it's wet, muddy, windy or just freezing, know this glove will serve you well.

The Youngstown Waterproof Winter XT glove is 100 percent waterproof and windproof. It was built to withstand the most grueling of extreme cold-weather tasks and is constructed using Youngstown's hallmark triple layer technology. Warmth begins with an ultra-soft, double-sided micro-fleece liner. A waterproof and windproof breathable membrane follows to wick away moisture and ensure dry hands. Perhaps most notably, Youngstown adds an impressive 200 gram layer of 3M Thinsulate™ for added insulation. Finally, a form fit durable outer shell protects hands and extends the life of the glove all while allowing flexibility.

With the aim of safeguarding the top of hand, the glove features extra knuckle protection. A water-resistant stretch nylon cover wards off nicks, scrapes and cuts. The Waterproof Winter XT glove also has an extended gauntlet cuff that fits over a jacket sleeve, efficiently locking out snow, wind and cold.

Special attention was paid to the design of the palm side of the glove in order to offer the most dexterious and tightest grasp possible. The base layer of the glove is fashioned from synthetic leather followed by heavy duty non slip reinforcements for added durability and grip. All this adds up to a glove that is extra tough but still flexible and comfortable enough for recreational activites such as hunting, cross country skiing and hiking. A terry cloth thumb can be used to easily wipe sweat and debris. The glove itself is double-stitched with bonded Nylon thread helping to ensure the glove will withstand many a long and arduous winter task.

The Youngstown Waterproof Winter XT Glove is available in sizes Small through XX Large.

Youngstown Glove Company manufactures the world's most durable performance work gloves. Founded in 2002, the company has been unwavering in their commitment to quality, innovation and customer satisfaction. Offering more than 30 performance work glove styles the company strives to exceed the demanding needs of professional workers. Every Youngstown style developed endures extensive testing – both in the laboratory and in the field – prior to being slipped onto customer hands. Thorough testing, proven patterns, innovative materials and meticulous quality control are all hallmarks of a company with a simple goal: to design the best working gloves you've ever owned.
