ROGUE RIDGE™ INTRODUCES RIDGE WARRIOR RB1000 E-BIKE FEATURING KRYPTEK® TYPHON™ CAMOUFLAGE

Tactical, Law Enforcement and Security Professionals Can Take on Any Terrain with the Most Advanced Off-Road Electric Bike on the Market

Belgrade, MT — New for 2018, the engineers at Rogue Ridge™ are proud to introduce the ultimate off-road electric bike for tactical, law enforcement and security professionals: the Rogue Ridge Warrior RB1000, featuring the unique battlefield-based camouflage pattern Kryptek® Typhon™.

“Electric mountain bikes have grown tremendously for use in places where gas-powered machines have limited access,” said Mark Garcia, Rogue Ridge founder. “My partner Rock Bordelon and I spent two years developing the Ridge Warrior RB1000 design and we are confident that it is the ultimate off-road e-bike. There is no other fat-tire e-bike on the market that has the durability, power, quality and features we do.”

The **Ridge Warrior RB1000 in Kryptek® Typhon™** was designed from the ground up to be a true tactical machine, starting with the Gates Carbon Belt Drive System. This system is basically a 1,000-watt motor system combined with a Panasonic 48V13AH Lithium Ion battery. It uses a carbon-fiber belt that lasts for over 10,000 miles of use and eliminates a derailleur, making tuning and maintaining the bike easier. The frame is hand-welded 6061 aluminum alloy, and the bike weighs in at 69 pounds. Perhaps most notable is the bike’s ability to hold up to 330 pounds of rider and gear. This is a key, as other e-bikes are not designed for heavier weights and can typically only handle the rider and some light gear.

“We pride ourselves on only using the highest quality components to deliver the best-built bikes for the demanding user, so partnering with only the best camo pattern for our bikes just makes sense. Kryptek® has a long-standing, highly respected reputation in the law enforcement market, and we are proud to offer our Ridge Warrior RB1000 in their stealthy Kryptek® Typhon™ pattern,” Garcia added.

The Ridge Warrior RB1000 has an average range of 29 miles without pedaling, and 50-60 miles in Pedal-Assist Mode – with a top speed of 30 miles per hour. This means security and law enforcement officials have the ability to cover a lot of ground without getting too tired to get the job done. It has a full-color digital display that shows speed, avg. speed, trip distance, remaining battery power. The Juggernaut tires are tubeless, but Rogue Ridge includes tubes in the tires to add an additional layer of durability. The Ridge Warrior bikes include mudguards and a 50-lumen, hand-activated headlight. Additional features include:

Motor: Bafang G320.1000

Fork: Mozo, dropout 135mm Hydraulic shocks

Drive: Gates inner 3-speed system

Throttle: Thumb throttle

Brakes: Hydraulic Tektro-E715 downhill disc brakes.

Brake levers: Promax HB-3188

Crank: Aluminum alloy, NSA1001,52T

Chain/Belts: Gates-NMN

Tires: Juggernaut 26" x 4.0" tubeless

Stem: Promax MA-400

The new Ridge Warrior RB1000 in Kryptek® Typhon™ includes a hi-visual police/security label, customized at time of order to the user’s needs. Police/Security lights/sirens packages are sold separately and can also be customized per the customer’s needs and specifications.

About Rogue Ridge

With over 25 years of outdoor industry experience, the company worked with top engineers to develop Rogue Ridge Bikes, the ultimate off-road, fat-tire e-bike available today. Determined to be the strongest, most reliable e-bike on the market, Rogue Ridge is the ultimate transportation for getting to those hard-to-reach places.
