## ONTARIO KNIFE COMPANY® INTRODUCES THE JERICHO® HANGER

### Keep Your Gear Organized With This Unbelievably Strong Hanger

Standard everyday plastic and metal hangers can typically handle a camo shirt or a light jacket without too much difficulty. Now if you try storing a full turkey vest, diving gear, or even fire-fighting equipment on one, you'll likely return to a heaping mess on the floor of your closet. Ontario Knife Company (OKC®) and its custom molding, machining, and tool works division Jericho Tool designed a solution for this problem with its new patent-pending Jericho Hanger.

The Jericho Hanger is made of rigid injection-molded polypropylene and features a thick, reinforced structure that is designed to hold up to 250 pounds of gear. At this weight specification, you can almost use it as a spreader bar when you are ready to skin your next doe! That said, OKC didn't stop with simply making the Jericho Hanger sturdy, but engineered it to include various mounting points to accommodate hunters, anglers, and first responders alike.

On the shoulders of the Jericho Hanger are indentions that will hold straps firm, so items like waders and vests will not slide off. Two vertical bars inside the frame not only add rigidity and strength to the hanger, but also add points of connection for items with clasps or carabiners. The bottom support of the Jericho Hanger features two more framed slots for additional connection points, as well as a double hook that can be used for holding boots or other items with small-diameter straps.

Bulky and heavy items have been relegated to unorganized mountains in the bottom of the closet or corner of the garage for far too long. Now, with a handful of Jericho Hangers, your gear can be stored with the care it deserves. Proudly designed and manufactured in the United States; the Jericho Hangers come in Black, Orange, Red, White, and Blue with an MSRP of \$12.95 each.

Founded in 1889, the Ontario Knife Company® is an award-winning knife, cutlery, and tool manufacturer operating out of Upstate New York for over 127 years. OKC® produces a wide range of tools, including cutlery and kitchenware, hunting and fishing knives, machetes, survival and rescue equipment, science and medical tools, and tactical knives. OKC has a long tradition of building knives and tools for the U.S. military, producing high quality equipment that has seen continuous service since WWII. In addition to being a major supplier to the U.S. Armed Forces, OKC leverages a network of distributors, dealers, and major commercial retailers to sell its products nationwide and internationally to over 35 countries. OKC's custom manufacturing division Jericho Tool®, advances capabilities including a broad-spectrum of injection molding, tool and die, and machining operations to provide white label and OEM manufacturing services for consumer and industrial goods. Collectively OKC's product lines and manufacturing services reach the house wares, sporting goods, tactical, security, law enforcement & first responders, education, science & medical, and industrial & agricultural industries.
