HAWKE® OPTICS ADDS NEW COMPACT SCOPES TO CROSSBOW LINE

Crossbow Accuracy Has Never Been Easier with New XB30 Compact Models

Continuing as a global pacesetter in producing value-packed, high-performance sporting optics, Hawke® Optics expands on its line of accurate and reliable crossbow scopes for 2018. Building on the success of the XB30 Pro Scope, Hawke proudly introduces two new XB30 Compact Scope models.

Crossbow shooters demand a scope they can rely on, packed with features to reflect today's modern crossbows. Not only must the scope be lightweight and compact, but it also must be durable and completely weatherproof to handle the dramatic conditions that hunters often face when in the field. The crossbow scope must be precise and adjustable as bolt placement is critical for success, with multiple aiming points that work like pins in a vertical bow sight. The all-new Hawke Optics XB30 Compact scopes meet all the needs of today's crossbow shooter. Each one is compact, lightweight and vigorously tested – perfect for today's crossbows.

The XB30 Compact scopes feature exclusive red/green illuminated, glass-etched XB Compact SR reticles with aim points from 20 yards out to 100 yards. The reticle is designed using Hawke's Vari-Speed technology, which allows you to dial in the speed of your crossbow, adjusting the aiming points for unsurpassed accuracy. The system uses the scope variable magnification as a calibration tool, allowing shooters to achieve even 10-yard increments on virtually any crossbow shooting up to 475 feet-per-second, depending on the model. The reticles also incorporate side-aim dots to allow for 10 and 20mph cross winds.

Two models of the XB30 Compact Scopes are available – the 1.5-6x36, and the 2-8x36. They each have a wide-angle view, and an all-new, patent-pending, set-and-forget locking speed adjuster ring that ensures the FPS setting does not change once zeroed. The 14-layer fully multi-coated optic scopes incorporate ½ MOA positive click turn turrets that help you find zero quickly and accurately. The XB30 scopes have a 30mm tube for maximum light transmission. The 1.5-6x36 XB30 Compact has a retail price of \$249.99, and the 2-8x36 has a retail price of \$279.99.

About Hawke

#VISIONACCOMPLISHED. Hawke is a worldwide market leader at the forefront of optical performance with class-leading innovation and design offering a complete line of sport optics from rifle, crossbow, shotgun and air gun scopes to binoculars, spotting scopes and accessories. Accuracy, strength and precision; Hawke optics blend iconic design, exceptional engineering and unrivalled craftsmanship to create an unforgettable viewing experience. As awareness of Hawke Sport Optics continues to grow, more customers are trusting Hawke as the unquestioned industry leader in optics. Learn more at www.hawkeoptics.com.
