## “GO ROGUE” WITH THE NEW RIDGE WARRIOR RM750 ELECTRIC FAT-TIRE BIKE FROM ROGUE RIDGE™

### The Strongest, Most Reliable Off-Road E-Bike for Hunting Deep in the Backcountry

Belgrade, MT — For when you want to get to those hard to reach places easily, quickly and quietly, there’s no better mode of transportation than the new Ridge Warrior RM750 by Rogue Ridge™, the newest addition to the company’s line of high-performance fat-tire electric bikes that can confidently take on any terrain with power from rocks and mud to sand and snow.

“If you hunt the backcountry, you understand first-hand how difficult it can be to pack game out from places where gas-powered machines can’t access,” said Mark Garcia, Rogue Ridge founder. “The new Ridge Warrior RM750 is the ultimate backcountry e-bike with the necessary power, durability and quality required to get hunters to and from the toughest hunting spots quickly and quietly,” he added.

Blast up steep hills and conquer the roughest land with the Ridge Warrior RM750, purposely built with the highest quality components available. It all starts with the bike’s powerful 750-watt motor system and 13 amp hour Samsung 48V13AH Lithium Ion battery which means the Ridge Warrior RM750 is capable of extra long rides into the backcountry at full power. The bike’s frame is tech welded 6061 aluminum alloy, making it strong enough to hold loads up to 330lbs of rider and gear. This is an important feature for hunters, especially if the hunt is successful and they’re planning on bringing their trophy back to camp. The Ridge Warrior RM750 is built to handle the extra load.

So, how fast can the bike go? The Ridge Warrior RM750 can reach speeds up to 20 miles per hour without pedaling. The bike has an average range of 25 miles without pedaling, and 50-60 miles in Pedal-Assist Mode. Also incorporated into the bike is a full-color digital display that shows speed, avg. speed, trip distance and remaining battery power. Its Kenda 26”x4.0” tires feature inner tubes for extra durability and a smooth ride. Like all Ridge Warrior bikes, the RM750 includes mudguards and a 50-lumen, hand-activated headlight. Additional features include:

*Motor: Bafang RM G06.750. DC*

*Fork: Mozo, dropout 135mm*

*Deraileur: Shimano 1x7 series*

*Throttle: Thumb throttle*

*Rear Cassette: ARDTY300D, 7 speed, Shimano*

*Front Brake: Shimano ASMRT26M 180mm*

*Rear Brake: Shimano ASMRT26M 160mm*

*Brake levers: Promax HB-3188*

*Tires: Juggernaut 26” x 4.0” tubeless*

*Stem: Promax MA-400*

The Rogue Ridge Warrior Ridge RM750 is available for a competitive retail price of \$3,700.

#### *About Rogue Ridge*

Rogue Ridge was founded after many years of packing game out of the backcountry and countless hours of research. With over 25 years of outdoor industry experience, the company worked with top engineers to develop Rogue Ridge Bikes, the ultimate off-road, fat-tire e-bike available today. Determined to be the strongest, most reliable e-bike on the market, Rogue Ridge is the ultimate transportation for getting to those hard-to-reach places.
