PUT THEM ON, GO TO WORK: YOUNGSTOWN® FUSION XT™ GLOVE OFFERS THE BEST OF BOTH WORLDS

Real Goatskin Palm Combined with Synthetic Top-of-Hand Make for Ideal Spring Work Glove

Spring marks the start of home renovations and a return to serious yard work. Take on whatever is on your DIY list this spring with the Youngstown® Fusion XT™ glove, a perfect blend of a traditional leather palm with a performance work glove top-of-hand. The ideal marriage of goatskin leather – one of the worlds most naturally comfortable and dexterous materials – with unsurpassed technical design ingenuity, the glove is built tough to last and protect all while feeling good on the hands.

Once you try on the Youngstown Fusion XT glove, you'll be hard pressed to find a better combination of leather and synthetic fabrics. The palm side of the glove is constructed of 100 percent high quality goatskin leather, which is incredibly soft and supple against the hand. The glove offers a superior level of flexibility giving the wearer the ability to grip yard and power tools tightly. The glove utilizes Youngstown's signature super saddle design, created specifically to increase protection in critical wear areas. This means double stitching with a bonded nylon thread throughout as well as a second layer of padding on the fingertips for added durability and protection.

The feel of real leather is taken up a notch by adding a tried and true performance glove pattern. When you start the demolition work on that bathroom redo this season, depend on the heavy-duty raised knuckle protection to keep hands safe. The technical top of hand features directional stretch nylon, which works to wick away heat and moisture leaving hands cool and dry. The easy on and off slip-fit safety cuff lends excellent breathability. And of course, Youngstown designers didn't miss a detail adding a terry cloth thumb for wiping sweat and debris as well as an ID tag on the cuff for easy identification.

The Youngstown Fusion XT glove is built to last season after season, is machine washable and treated not to shrink, stretch or harden. The glove is available in sizes small through XX large.

Youngstown Glove Company manufactures the world's most durable performance work gloves. Founded in 2002, the company has been unwavering in their commitment to quality, innovation and customer satisfaction. Offering more than 30 performance work glove styles available in sizes small through XX large, the company strives to exceed the demanding needs of professional workers. Every Youngstown style developed endures extensive testing – both in the laboratory and in the field – prior to being slipped onto customer hands. Thorough testing, proven patterns, innovative materials and meticulous quality control are all hallmarks of a company with a simple goal: to design the best working gloves you've ever owned.
