TAP, SCROLL AND TYPE WITH YOUNGSTOWN® TOUCHSCREEN™ GLOVE

Built to Work With a Touchscreen but Still Tough Enough for Construction Work, Glove Keeps Hands Warm and Safe While Operating Digital Devices

Living in a digital world makes life easier, most of the time. Touchscreen devices are designed as human interface instruments most needing a human fingertip to operate – something that is not always readily available in harsh weather or in the midst of completing physical tasks. The Youngstown® Touchscreen™ glove aims to help make working with digital devices easier all of the time, giving you the freedom to operate touchscreen devices – from iPads and GPS screens to smart phones and delivery acquisition devices – all while keeping hands comfortable and safe with a glove design work professionals have come to trust.

The first ever touchscreen compatible glove created for the pro-contractor, The Youngstown Touchscreen glove features capacitive material on the thumb, index and middle fingers so you can swipe and type as easily as you do with your bare hands. The glove allows for a precision touch and works with both resistive and capacitive touchscreens. Made to increase efficiency by protecting hands while allowing them to stay functional, the glove fingertips won't scratch or damage screens and monitors. The capacitive material is built into Youngstown's renowned and patented glove pattern making it also an ideal performance glove for delivery persons, inventory specialists and on-the-go professionals.

As with each of the company's gloves, the Youngstown Touchscreen glove is purposely built to deliver protection and comfort. The glove has a durable palm, tough enough for construction work. It also has non-slip reinforcement throughout the palm to ensure durability as well as a tight and secure grip. Internal knuckle protection on the top of hand keeps hands safe from scrapes and other abrasions. A terry cloth thumb is built into the glove for wiping sweat and debris. Finally, the entire glove has been double-stitched with bonded nylon thread in order to last task after task.

The Youngstown Touchscreen glove is machine washable and available in sizes small through XX large.

Youngstown Glove Company manufactures the world's most durable performance work gloves. Founded in 2002, the company has been unwavering in their commitment to quality, innovation and customer satisfaction. Offering more than 30 performance work glove styles available in sizes small through XX large, the company strives to exceed the demanding needs of professional workers. Every Youngstown style developed endures extensive testing – both in the laboratory and in the field – prior to being slipped onto customer hands. Thorough testing, proven patterns, innovative materials and meticulous quality control are all hallmarks of a company with a simple goal: to design the best working gloves you've ever owned.
