IN A THICKET OF CHOICES, THE NEW-FOR-2012 FIELDLINE® PRO-SERIES TREELINE DAY PACK™ EMERGES A WINNER

The experts at Fieldline® take outdoor and hunting gear as seriously as the hunters who use them. So when it's time to flush out a rugged new day pack perfect for those all-day scouting trips or treks in the field, no creature comfort or safety measure is overlooked. Emerging from a dense forest of options is a trophy pack for today's avid hunter, the new-for-2012 Fieldline Pro-Series Treeline™ Day Pack.

This rugged pack is chock full of ingenious features, making the new Fieldline Pro-Series Treeline Day Pack as durable and versatile as it is comfortable and convenient. Measuring 18.5" x 12.6" x 7.5", the new Fieldline Pro-Series Treeline Day Pack can accommodate everything from extra layers to snacks. An extra-large main compartment with 3/4 zipper opening and a roomy secondary compartment with organizer ensure that your essential gear can be neatly tucked away yet easily accessible. An extra-handly front pocket with zipper enclosure lets you quickly grab your keys, cell phone, handheld GPS or hunting license, without having to dig deep into the recesses of the pack.

Fieldline has thought of virtually everything to make this deluxe padded pack your go-to piece of hunting gear. A yoked shoulder strap system with adjustable sternum slider and side compression straps help balance gear, while a well-designed, one-inch belt adds support.

Keeping you under the radar are ultra-quiet zipper pulls and inconspicuous designs of either Mossy Oak® Infinity or Realtree All Purpose™ camouflage. Easy to find, however, are the pack's hydration features, including left and right elastic mesh pouches, perfect for storing water bottles, and a 2-liter hydration reservoir attachment (hydration reservoir not included).

The new Fieldline Pro-Series Treeline Day Pack takes convenience to a whole new level with Fieldline's innovative Gear-Lock Modular Locking System. Use the Fieldline Pro-Series Gear Lock accessories to adjust your pack into multiple configurations, either before your trip or while out in the field.
