## **YOUNGSTOWN® MWG TOUCHSCREEN™ GLOVE ANSWERS MILITARY AND LAW ENFORCEMENT NEEDS**

### **Touchscreen Compatible Glove Delivers Protection and Functionality**

There are gloves that work on touchscreens, and then there is the Youngstown® MWG TouchScreen™ glove, the company's tactical work glove designed specifically for law enforcement and military applications. A league above other touchscreen gloves, the all-black Youngstown MWG TouchScreen glove allows you to operate touchscreen devices while keeping hands comfortable and protected. The glove was built with the understanding that in the world of combat and law enforcement where hand protection is often a must, the time it takes to slide a glove off and back on could be crucial minutes lost.

Today, more and more digital devices have touchscreens – from smart phones and GPS devices to medical equipment and in-vehicle touchscreen monitors. Most screens are built to respond to the electric signals transmitted through the skin. Gloves interfere. The Youngstown MWG TouchScreen glove has integrated special technology into their patented glove design so you can take that call, text and scroll without having to remove your performance work glove. In order to complete the connection between your finger and digital screen, the Youngstown MWG TouchScreen glove utilizes capacitive material which has been designed into the thumb, index and middle fingers. The glove has been constructed to work with both resistive and capacitive touchscreens and offers an accurate touch even in cold, humid and dry conditions. Gloved fingertips will not scratch or damage monitors or screens.

The precision touch is coupled with a Youngstown field-tested glove pattern proven to advance efficiency, dexterity and deliver an improved grip. The Youngstown MWG TouchScreen glove has an all-black silicone palm so you can tightly grasp onto objects. The non-slip reinforcement built into the palm also increases the overall durability of the glove. On the top of hand, internal knuckle protection keeps the back of hand from getting scuffed or scraped. The glove also has a terry cloth thumb for wiping sweat and debris. And, to make the glove as tough as its wearer, the entire glove has been double-stitched with bonded nylon thread to extend the overall life of the glove.

The Youngstown MWG TouchScreen glove is machine washable and available in sizes small through XX large.

Youngstown Glove Company manufactures the world's most durable performance work gloves. Founded in 2002, the company has been unwavering in their commitment to quality, innovation and customer satisfaction. Offering more than 30 performance work glove styles available in sizes small through XX large, the company strives to exceed the demanding needs of professional workers. Every Youngstown style developed endures extensive testing – both in the laboratory and in the field – prior to being slipped onto customer hands. Thorough testing, proven patterns, innovative materials and meticulous quality control are all hallmarks of a company with a simple goal: to design the best working gloves you've ever owned.
