YOUNGSTOWN® PRO XT™ GLOVE: THE ESSENTIAL WORK GLOVE

Company's Toughest Performance Glove for Rugged Jobs

Simply put, the Youngstown® Pro XT™ glove is a glove everyone should own. Built rugged for rugged tasks, the glove is an incredibly hardworking, top-of-line patented design constructed to be as comfortable as it is durable. Perfect for a wide variety of unforgiving jobs from shoveling and fence building to chopping wood and brush clearing the Youngstown Pro XT will surely become a “go to” item in your toolbox.

Whether you plan to work these gloves hard on the weekends or five days a week, the Youngstown Pro XT glove is everything a work glove should be, lasting the test of time all while providing comfortable dexterity and a firm grip. Including a number of highly designed one-of-a-kind Youngstown features, the glove has a robust triple layered palm which includes two layers of synthetic leather and an additional layer of heavy duty non-slip reinforcement in critical wear areas on the palm, fingers and thumb. A non-slip saddle piece for added grip extends over the index finger and thumb.

The technologically advanced features continue on the back of hand where moisture wicking stretch nylon works to keep hands dry. Safety was at the forefront of the minds of Youngstown designers when they included double knuckle protection making the glove ideal for demolition, farming, logging or landscaping. Additional protection comes in the form of an extended wrist cuff, which helps protect the wrist bone and aids in support, lessening hand and wrist fatigue. Finally, a functional terry cloth thumb wipe was built into the glove for sweeping sweat and debris off your face.

The Youngstown Pro XT glove is machine washable. The glove is available in sizes small through XX large.
