KEEP SWEATY HANDS AT BAY THIS SUMMER WITH THE YOUNGSTOWN® MESH UTILITY PLUS™ GLOVE

Designed to Work in Hot Conditions New Glove Still Offers Maximum Protection and Comfort

Let your palms take a breather – literally – with the new Youngstown® Mesh Utility Plus™ glove which features ultra-breathable mesh on the top-of-hand to keep your hands cool and dry. Perfect for working in warm environments, the Youngstown Mesh Utility Plus glove integrates all the company's best features with high tech top-of-hand mesh. The best part: there are no trade-offs – your hands stay cooler, without sacrificing safety or dexterity.

We all expect to sweat when working hard, but overly damp hands can grow annoying and become uncomfortable when trying to complete a job. The ultra breathable mesh built into the glove allows for air to flow both in and out, keeping hands drier. This makes the glove ideal for everything from yard work and professional landscaping to warehouse jobs and general construction tasks.

While other breathable gloves on the market tend to offer less protection, the Youngstown Mesh Utility Plus glove doesn't skimp on safety and support design features. The rugged performance work glove offers padded knuckles to keep your digits protected as well as a durable, reinforced palm. Layered with synthetic leather, the palm has heavy-duty non-slip reinforcement in all the critical wear areas – palm, fingers and thumb – making for both a tight grip and a longer overall lifespan for the glove. Notably, the all-purpose abrasion-resistant glove remains pliable and offers a surprising level of dexterity giving the wearer the ability to use even small tools with the glove on.

An adjustable Velcro® closure does double duty offering support as well as keeping unwanted dirt from entering the glove. A terry cloth thumb allows you to wipe away sweat and debris.

The Youngstown Mesh Utility Plus glove is machine washable and available in sizes small through XX large.

Youngstown Glove Company manufactures the world's most durable performance work gloves. Founded in 2002, the company has been unwavering in their commitment to quality, innovation and customer satisfaction. Offering more than 30 performance work glove styles available in sizes small through XX large, the company strives to exceed the demanding needs of professional workers. Every Youngstown style developed endures extensive testing – both in the laboratory and in the field – prior to being slipped onto customer hands. Thorough testing, proven patterns, innovative materials and meticulous quality control are all hallmarks of a company with a simple goal: to design the best working gloves you've ever owned.
