## ONTARIO KNIFE COMPANY® THROWS EXTREME SITUATIONS A CURVE

### OKC Introduces a Lighter, Slim Karambit Knife for Utility and Combat

Ontario Knife Company® (OKC) has a history for taking classic designs and adding a unique touch that makes the end product something useful, durable and entirely OKC. The Karambit-style knife is an ancient design made for combat, utility and survival. OKC has taken everything you've ever known about the Karambit knife and thrown it a Curve.

"The Karambit-style knife is a classic blade, and we've put our own bend on it with the Curve," said Andrew Yates, Vice President of Sales and Marketing for OKC. "The Curve fits your hand extremely well, giving you more power and control over the blade. This makes it a great knife for tactical, combat and survival situations, as well as it being a solid all-around utility blade for everyday use. People that normally wouldn't opt for a Karambit knife will find they really appreciate the Curve."

The OKC Curve is an all-new, lighter, slimmer Karambit knife with a high carbon-steel blade that has the characteristic downward-curving blade and looped handle. These knives are great for combat and tactical situations, but are also quite useful in survival and utility scenarios, too. The Curve has an overall length of 7.8 inches, with a 3.9-inch curved blade. The steel carries a 55-57 HRC hardness rating so you can rest assured that it will hold an edge take on every challenge. The durable handle fits extremely comfortably in the hand and has a laminated hardwood grip for durability and a classic style and look. The Curve comes with a fitted nylon sheath for easy carrying.

Classic design. Reasonable price. Uncompromised quality. The Curve is 100-percent OKC.

Founded in 1889, the Ontario Knife Company® is an award-winning knife, cutlery, and tool manufacturer operating out of Upstate New York for over 125 years. OKC® produces a wide range of tools, including cutlery and kitchenware, hunting and fishing knives, machetes, survival and rescue equipment, science and medical tools, and tactical knives. OKC has a long tradition of building knives and tools for the U.S. military, producing high quality equipment that has seen continuous service since WWII. In addition to being a major supplier to the U.S. Armed Forces, OKC leverages a network of distributors, dealers, and major commercial retailers to sell its products nationwide and internationally to over 35 countries. OKC's custom manufacturing division Jericho Tool®, advances capabilities including a broad-spectrum of injection molding, tool and die, and machining operations to provide white label and OEM manufacturing services for consumer and industrial goods. Collectively OKC's product lines and manufacturing services reach the house wares, sporting goods, tactical, security, law enforcement & first responders, education, science & medical, and industrial & agricultural industries.
