## HAWKE® OPTICS ADDS FIBER DOT RETICLE TO VANTAGE WA RIFLESCOPE LINE

### The Vantage WA Scope with L4A Fiber Dot Reticle Provides Daylight Bright Center Dot

[Hawke® Optics](#), a worldwide leader in quality sporting optics that perform outstanding in the field while maintaining optimum value for the consumer, is bringing brighter things to your shooting world with the addition of the L4A Fiber Dot reticle to two models of the famous Vantage WA line of riflescopes. The [Vantage 30 WA 2.5-10x50](#) and [Vantage 30 WA 3-12x56](#) will amaze you with features, clarity, and precision.

The new L4A Fiber Dot reticles have an intensely bright, red-illuminated center dot. The dot is easy to see under any shooting light, and it is fully adjustable with 11 brightness settings. The classic L4A Dot reticle gives a clean and uninterrupted view of your target. The L4A Dot uses an outer post design that helps keep more of the target visible while you aim. This gives you better accuracy and helps with tracking the target before the shot.

Both the Vantage 30 WA 2.5-10X50 and Vantage 30 WA 3-12X56 are built on a 30mm main tube that allows for more light to enter the scope for better vision and field of view, especially in low-light conditions. These models also have fully multi-coated optics with Hawke's H2 glass and 11 layers of coatings for optimal clarity and light transmission.

The Vantage 30 WA 2.5-10x50 (MSRP \$359) model gives you a field of view of 50.4-12.6 feet at 100 yards and has a generous 3.5 inches of eye relief. The Vantage 30 WA 3-12x56 (MSRP \$379) gives you a field of view of 43.8-11.4 feet at 100 yards. Both scopes have adjustable side focus and ¼ MOA adjustment, too, making them loaded with the features you've been looking for in a value-packed optic. When you then add Hawke's No Fault Lifetime Warranty, covering the scope for life, it's clear this is one of the best-valued rifle scopes on the market today.
