## **NEW-FOR-2013 WOODLAND 20™ BY RINEHART® TARGETS — YOUR VERSATILE GO-TO TARGET FOR INTENSE PRACTICE ANYTIME, ANYWHERE**

Rinehart® Targets has added yet another contender to its rugged and value-driven Woodland Series this year with the addition of its new Woodland 20™ Target. Backed by more than two decades of arrow-stopping excellence, the larger new 20"x20"x13" cube-shaped target lives up to the company's tradition of durability and function for an all-in-one target solution perfect for any level shooter.

A bigger size means more face space for those longer shots, and believe us when we say this target can take the heat from field-points, broadheads and even expandables at any range with pride. The target's unique Woodland Series FX™ Foam composition is to thank for its incredible durability — allowing the target to stop any type of arrow from any bow and never lose its shape. The new Woodland 20 by Rinehart also boasts six-sided shooting, complete with more than 40 target zones for honing and perfecting your aim. For added versatility, shooters can easily post their favorite paper targets to the Woodland 20 — making it the perfect practice partner anytime, anywhere, year-round. And when your quiver is empty and it's time to collect your arrows, extracting is a breeze thanks again to the target's resilient Woodland Series FX Foam technology.

Rinehart wants to ensure you can enjoy hours of shooting fun from the archery club to the backyard, which is why the company left no stone unturned to make the target lightweight and easy to transport. A sturdy braided rope handle provides convenience when moving the target from one practice session to another while its cube shape makes sliding the target in and out of your truck or SUV a breeze. Like all Rinehart Targets, the Woodland 20 is built with extreme resistance to the sun, hot or cold weather conditions, allowing for year-round practice in all types of climates.

For even more options, check out other sizes available in the Woodland Series including the Woodland 16 (which measures 16"H x 16"L in size) or the Woodland 14 (which measures 14"H x 14"L in size).

For more information about the new Woodland 20 by Rinehart Targets, or any of company's extensive premium quality targets for bowhunters and competitive archers, contact Rinehart at 1809 Beloit Avenue, Janesville, WI 53546 • Telephone: (608) 757-8153 • Or visit [www.rinehart3D.com](http://www.rinehart3D.com).
