ARCHER XTREME™ TITANIUM XTREME RESETS THE BAR

Titanium Bowsight Featuring Lightweight Durability and Strength That Will Perform on the Most Xtreme Hunts

Titanium has long been recognized for its superior characteristics of strength, durability and lightweight — making it a top choice of engineers for aircrafts, missiles, rocket construction — and now the Xtreme archers top choice for bowsights! When you require only the best, you need titanium; specifically, you need the Titanium Xtreme™ from Archer Xtreme, the official sight of Team Elk (RMEF) and the only machined titanium bowsight in the world!

The Titanium Xtreme starts with a two-inch titanium sight housing, which offers a superior field-of-view and enhanced target acquisition in low-light conditions. The Titanium Bracket Ridge system (TBR) provides unmatched strength and thanks to its titanium construction, will resist the elements. Archer Xtreme's new HV Guard Ring system enhances accuracy by showing the slightest torque or misalignment of the sight housing and the peep sight for better alignment when making critical shots.

Beyond the bulletproof construction, the Titanium Xtreme has every feature you would expect to find on a sight constructed for Xtreme performance including: five .019" Ultra Super Flex fiber optic pins in red, green and yellow. Each pin is constructed using Archer Xtreme's Center Core Pin technology which features stainless steel tube pins to protect fragile fiber optics.

And Archer Xtreme's engineers did not stop there. The Titanium Xtreme also utilizes Archer Xtreme's Fiber Harness technology — the ultimate in protection and light transmission to each pin. The Titanium Xtreme is fully tunable on both the second and third axis for accurate shooting on flat ground or from an elevated/low lying position. Set up is a snap thanks to the Easy-Set Knobs, which also feature Archer Xtreme's innovative tool locks to ensure the sight doesn't loosen or drift when you head to the field.

Other stand out features that make the Titanium Xtreme rise above the competition include the RH/LH reversing bracket, rear LED deployment, laser marking for both windage and elevation, absolute zero pin gap and a full lifetime warranty. The Archer Xtreme Titanium Xtreme is available in Blackout /Ti Gray to complement any bow while remaining practically invisible to prey during the hunt.

For more information on the new Archer Xtreme Titanium Xtreme or Archer Xtreme's full selection of high-performance sights, quivers, stabilizers and archery accessories, please contact: Archer Xtreme at P.O. Box 328 Belgrade, MT 59714. • Telephone: (406) 924-6113 • Or visit www.archerxtreme.com.
