## HAWKE® OPTICS BREAKS INTO MARINE AND BOATING LIFE THEY ARE MORE THAN JUST BLUE – HAWKE'S MARINE OPTICS OFFER SUPERIOR PERFORMANCE OFFSHORE

Hawke® Optics, a worldwide leader in precision optics with outstanding performance in the field and optimal value for the consumer, has expanded into marine and boating life with their line of Endurance ED Marine Optics. Designed to suit all marine applications, the Marine Optics family of binoculars and monoculars is superior.

Hawke's Endurance ED Optics have been distinguished for their incredible performance and reliability for over a decade. The Marine Optics line is no different. Hawke has grown their award-winning selection with optics that are specifically designed for marine and boating applications. These models are 7x magnification, making them ideal for being on the water, as the lower the magnification power, the more stabilized your viewing image will be. They are designed with advanced BAK-4 roof prism optical systems making them far more compact, modern, and lightweight than the industry norm.

Your Marine Optics are waterproof to IP67, so they aren't afraid of going overboard, even if you are! This protection rating means your optics are fully sealed against foreign bodies such as dirt, dust, and other particles. They have one of the highest ratings of protection against full water immersion for up to 30 minutes at 1 meter. Their resistance to corrosion from the salty air makes them a must have for life on or near the ocean! They are purged and filled with dry nitrogen, meaning they will not fog over in cold conditions or when you need them the most.

The System H5 optics from Hawke provide crisp, clear, and bright images with enhanced light transmission. Endurance ED models benefit from this system, which utilizes ED glass to reduce color fringing, known as chromatic aberration. The Fully Multi-Coated lenses provide high resolution images which ensure no details are lost when viewing at a distance. Effortless focusing and impressive depth of field makes these binoculars quick and easy to use. All Marine Optics are designed with a wide-angle field of view, and are water and fog proof with a high grip rubber coated body. Endurance is designed to battle the elements.

Two of the models, 7x50 Binocular and 7x42 Monocular, have an integrated compass for navigation. The compass on the binocular model is illuminated for even more visibility in low light conditions. Many boaters have onboard navigation systems, but if those systems fail, you'll have a fail-safe with your optics! These models are also designed with a rangefinding reticle, to be used to calculate the distance between you and another object. Three other models make up the Marine Optics line, including a 7x32 and 7x50 Binocular and a 7x42 Monocular.

Binocular models come with a high-visibility floating neck strap and monocular models come with a high-visibility floating wrist strap to protect your optics in case they fall overboard. You also get lens covers, a protective carry case, carry bag and lens cleaning cloth. Have no fear of damage thanks to Hawke's No-Fault Lifetime Warranty, they have you covered. ### About Hawke

#VISIONACCOMPLISHED. Hawke is a worldwide market leader at the forefront of optical performance with class-leading innovation and design offering a complete line of sport optics from rifle, crossbow, shotgun and air gun scopes to binoculars, spotting scopes and accessories. Accuracy, strength, and precision; Hawke optics blend iconic design, exceptional engineering, and unrivalled craftsmanship to create an unforgettable viewing experience. As awareness of Hawke Sport Optics continues to grow, more customers are trusting Hawke as the unquestioned industry leader in optics.
