ONTARIO KNIFE COMPANY® PROUDLY INTRODUCES ITS NEW GUN TOOL LINE Innovative Tools for the MK-19, M-240B and M2 Automatic Weapons

Most craftsmen know the importance of having the right tool for the right job, but in harms way having the right tool to quickly service a weapon could mean the difference between life and death for men and women serving in our armed forces. Ontario Knife Company® has nearly a century-long history of supplying top quality knives and tools to the U.S. military; building on this longstanding relationship, the Ontario Knife Company has commissioned a line of innovative tools to support the needs of our soldiers in the field.

OKC's introductory offering includes three new revolutionary tools designed by cavalry scout Benjamin Bryant, SSG (Ret) who is acutely aware that in battle conditions, speed equals saved lives. OKC's gun tools allow the operator or maintenance technician to quickly disassemble and reassemble the MK-19 automatic grenade launcher, M-240B and M2 machine guns. Built for gunners by a gunner who understands the platforms and their requirements from a technical perspective and as an experienced operator in the field, these innovative tools minimize the time required to field strip and service some of the line units' largest, most-complicated, and time-consuming weapons.

OKC MK-19 Gun Tool

American made, the MK-19 Gun Tool is crafted from 5160 Carbon Blade Steel and heat-treated to RC 53-55 for toughness and durability. Overall, the MK-19 Gun Tool measures 11.794 inches and features an impact resistant PVC (Type II) bumper material. The tool comes in versions finished with either a black texture powder coating or a phosphate coating, to meet different mission parameters and to resist the elements when operating in the humid jungle environment of South America or the dry arid conditions of the Middle East.

OKC M-240B Gun Tool

The M-240 has been a workhorse in the U.S. arsenal since the late-1970s, but it has taken three decades for anyone to come up with an innovation such as the M-240B Gun Tool to maintain it. The M-240B Gun Tool is seven inches, constructed from 5160 Carbon Blade Steel and boasts a RC 53-55 rating. The bumper material is impact resistant PVC (Type II) and the tool comes in a durable black textured powder coat and phosphate coat versions.

OKC M2 Gun Tool

Just as OKC aids the medium machine gunner with M-240 Gun Tool, it also has the solution for the heavy machine gunner with the M2 Gun Tool. The M2 Gun Tool has all of the great specs, coating options, and features of the M-240 Gun Tool and MK-19 Gun Tool, but tapes out at 7.675 inches and is made from 1095 carbon steel.

Founded in 1889, The Ontario Knife Company is a U.S. owned and operated organization that continually stays on the forefront of knife designs and cutting-edge technology. Ontario's military supply roots go deep into its history, as the company has been supplying quality cutlery to the U.S. Military since WWII. Today, the company consistently develops new knife designs that allow military personnel to have the products they need in order to get their jobs done both on and off of the battlefield. Ontario Knife is also especially proud of being selected as the sole provider of the United States Marine Corps OKC3S Multi-purpose Bayonet System and the Model 4 Rescue Strap Cutter. In addition to being a major supplier to the U.S. Armed Forces, Ontario Knife teams with a nationwide network of distributors/dealers to market its products to many diverse consumer and niche markets including the tactical/military, hunting, outdoors, law enforcement and cutlery industries. Worldwide sales activity encompasses more than 46 countries and continues to grow.

For more information about Ontario Knife Company and its industry-leading line of advanced knives, machetes, edged products and specialty tools, contact Ontario Knife Company at P.O. Box 145-26 Empire Street · Franklinville, NY 14737 · Telephone (716) 676-5527 · Or visit www.ontarioknife.com. The Ontario Knife Company is a subsidiary of publicly traded Servotronics, Inc. (listed as NYSE MKT - SVT).
