BUSY PROFESSIONALS CAN NOW RELY ON THEIR BADGE TO BE THERE

With The New Gear Keeper® RT5 Super Badge Retractor

For many working professionals, maintaining security measures with proper identification is part of the daily job — so it's important that they are able to seamlessly locate and present their badges. Unfortunately, the majority of badge retractors cannot be relied upon because they are not built to withstand the rigors of daily use. That's why the industry leaders at Hammerhead Industries® created the new RT5 Super Badge Retractor™. Now, these busy professionals can focus on the job without worrying about creating security delays or the nuisance of losing their badges.

The new Gear Keeper RT5 Super Badge Retractor has an array of industry-leading features that puts it in a class of its own for versatility and reliability. From its generous 36-inch extension to the 40-pound break strength on its sturdy spectra/nylon line, Gear Keeper designed it to withstand repetitive use — perfect for those employed in high security areas and have to extend their badge frequently. With the incomparable Gear Keeper badge retractor, boasting a smooth 2.5 oz. retraction force for ease of use, users can feel comfortable about effortlessly keeping their badge right where it belongs.

The Gear Keeper RT5 also includes robust stainless steel spring and hardware and a high-impact case to stand up to rigorously daily use. It comes with a 360° rotating spring clip mount, so the unit is kept in the correct position and rotates seamlessly in use for a wide range of applications.

For more information about the new Gear Keeper RT5 Super Badge Retractor — or any of the company's innovative retractable tether products — contact Hammerhead Industries, Inc. at 1501 Goodyear Avenue, Ventura, CA 93003 Phone: (805) 658 9922 • Fax: (805) 658-8833 • Or visit www.gearkeeper.com.
