BECOME AN ARCHERY LEGEND WITH THE RINEHART NASP STUDENT TARGET

Rinehart Targets, leading manufacturer of innovative and lifelike 3D archery targets, developed its “teacher preferred” targets to meet educational and safety standards set by the National Archery in the School Program (NASP). The bright multi-colored rings make aiming easier for children and adults. Also, the built-in stand removes all metal from the Rinehart NASP Target, eliminating any chance of scratching a gym floor.

The Rinehart NASP Target measures 80 centimeters in diameter and weighs about 30 lb. The lightweight size makes set up and removal easy and fast for use at school or at home. It’s also perfect to take along on family vacations. Although geared toward educating kids, archery enthusiasts of all ages will have fun with this versatile target.

The Rinehart NASP Target is constructed from the company’s exclusive, Rinehart solid “self-healing” foam that can absorb endless field point strikes without tearing or losing its realistic shape. The advanced foam material also makes arrow removal so easy even a child can do it — without lubricants, arrow pullers or frustration. The target is also designed with a patented, replaceable insert, which extends life and enjoyment of the target.

To learn more about the Rinehart NASP Target — or to get more information on the company’s extensive product line up of premium 3D targets for bowhunters and competitive archers — contact Rinehart at 1809 Beloit Avenue, Janesville, WI 53546 • Telephone: (608) 757-8153 • Or visit www.rinehart3-D.com.
