THE NEW RINEHART TARGETS'® RED STAG TAKES ARCHERY TO EXOTIC NEW LEVELS

Be Prepared for The Ultimate Challenge with New 3-D Red Stag Archery Target

Janesville, WI — Rinehart Targets®, manufacturers of the most durable and life-like archery targets on the market, has taken 3-D targets to a whole new level with the introduction of its new Rinehart 3-D trophy Red Stag target.

“Our life-size Big Game targets from our Signature Competition series are some of the most challenging and realistic 3-D targets available,” said James McGovern, President of Rinehart Targets. “The new Red Stag target lets competition shooters and bowhunters prepare for one of the most exotic and challenging big-game animals to hunt.”

The Rinehart Red Stag Target presents as a majestic beast, standing eight-feet tall and five-feet long. When one dreams of a red stag, this is exactly how most envision one – posed majestically on a rock, surveying its domain. What better way to present a target? The size of the target simulates a 500lb. Red Stag. The Rinehart Red Stag features the company’s famous, solid self-healing and UV-resistant foam construction that will last for years of shooting. This target has a patented, locking target insert, also made from the same self-healing foam, that is replaceable should that become necessary.

Like all Rinehart 3-D targets, arrow removal is simple and easy thanks to its foam construction that stops even the fastest arrows. Each target can withstand years of weather and exposure to UV-light that would destroy less robust targets in short order. The new Red Stag target adds to the long list of amazing and lifelike targets available. Whether you’re shooting 3-D competition, or preparing for the hunt of a lifetime, the Rinehart Red Stag Target prepares archers for a realistic and majestic challenge.
