HUNTERS CAN CUT TO THE CHASE WITH NEW ONTARIO KNIFE COMPANY

RANGER SERIES LITTLE BIRD ORANGE G10™

Low Profile Design and High Performance Put This Blade in a Class All Its Own

Experienced hunters know that the right tools can make all the difference in the field — so the experts at Ontario Knife Company® have introduced the ultimate hunting companion: the new Ontario Knife Company Ranger Series Little Bird Orange G10™. This amazingly sturdy, versatile 4” knife provides the best of both worlds — compact design and incredible toughness — with a unique sweeping curved 1.75” blade that provides the maximum in ultra-sharp cutting surface, but still falls within the limits for knife laws worldwide for on-person carrying.

Plus, this high performance, low profile knife is painstakingly crafted from high grade 1095 steel on its black texture powder coated blade, so it can slice through bone, hide, or brush for years without dulling — perfect for skinning or field dressing small or large game.

The new Ontario Knife Company Ranger Series Little Bird Orange G10 is as easy to use as it is to carry, and was developed to get the job done, whether the user is a grown man, woman or child. There’s nothing in its size on the market that provides such a wide range of serious cutting applications — and with its .1563” blade, it can stand up to the toughest jobs a hunter comes across, from hacking through tough material to precision cutting — and can even be sharpened up on a rock in the field for survival if needed.

And cleaning it is a snap — with an Allen wrench, the handle can be removed in seconds to wipe off any debris or moisture at day’s end back in camp. Its blaze orange glass-based fiber handle makes it easy to spot in low light situations, and its innovative design allows a firm two finger palmed grip, so no matter how wet or bloody it gets, it stays right where you want it. The Ontario Little Bird Orange G10 comes standard with a black custom molded Kydex® sheath with a sturdy para-cord lanyard. This unique design will make the cut, no matter what you’re facing in the field, and like all Ontario Knife Company products, is proudly made in the U.S.A.
