HAWKE® OPTICS' NEW MONOCULARS ARE THE ONE CLEAR CHOICE

The New Endurance ED and Nature-Trek Monoculars are the Ideal Choice for Crystal-Clear Vision in a Light and Compact Optic

Hawke® Optics, already known as a worldwide leader in advanced sporting optics, continues its traditions with a new line of high-quality monoculars that offer outstanding performance in the field. These monoculars continue Hawke's tradition of extreme performance and optimal consumer value, making them a clear choice. Whether you choose from the clarity and performance of the Endurance ED models, or the extreme value of the Nature-Trek series, you'll clearly see that a monocular is the one piece of gear you've been needing.

Why a monocular? We all know the value of a good binocular and most of us have at least one pair. A monocular offers similar use, but at less than half the weight and cost. Plus, a monocular offers faster target acquisition because you don't have to adjust for both eyes looking through the optic. For hunters there is an added benefit to having less motion involved in using the monocular.

The Endurance ED monocular is available in four models. Each has extra-low dispersion ED glass for extreme clarity with fully multi-coated optics that make the image you see crystal clear. The Endurance ED Monoculars use high-resolution, phase-corrected BAK-4 roof prisms as well. The compact and lightweight monoculars are rubber-coated for durability and a steady grip, and they have attached, flip-up lens covers for maximum protection. The eye cups twist up, with position stops that allow you to set your perfect eye relief. The 42mm models have a two-turn focus knob and a tripod thread for added versatility.

The Endurance ED Monoculars come in an 8x25 with a 356-feet at 1,000 yards field of view. This model has an MSRP of \$64.99. The 10x25 model has a field of view of 288-feet at 1,000 yards and carries an MSRP of just \$69.99. The 8x42 model with focus knob has a 388-feet at 1,000 yards field of view and retails for \$99.99. There is also the 10x42 model that has a 304-feet field of view at 1,000 yards. It costs just \$109.99. All models are fully nitrogen purged and are water and fog proof.

The Nature-Trek Monoculars are fully multi-coated for clarity and have high-resolution, phase-corrected BAK-4 roof prisms. The Nature-Trek monoculars are nitrogen purged and are water and fog proof. Each model has a durable rubber-coated outer, and have attached, flip-up lens covers for maximum protection. The eye cups twist up, with position stops.

Nature-Trek series monoculars are the most value-packed in the industry. The 8x25 model has a 356-feet at 1,000 yards field of view and an MSRP of just \$49.99. Looking for a little more power? 10x25 model has a field of view of 288-feet at 1,000 yards and carries an MSRP of just \$54.99. The two 42mm models have a two-turn focus knob and a tripod thread, with the 8x42 model having a 388-feet at 1,000 yards field of view. It retails for just \$79.99. The 10x42 model has a 304-feet field of view at 1,000 yards. It costs just \$84.99.

Like all Hawke Optics, the monoculars carry the Hawke Lifetime Warranty to the original owner. Hawke is a family owned and run business and strives to make the best products available at a significant value to the buyer. Pick up one of these high-quality monoculars for yourself and see why it is the one clear choice.

About Hawke

#VISIONACCOMPLISHED. Hawke is a worldwide market leader at the forefront of optical performance with class-leading innovation and design offering a complete line of sport optics from rifle, crossbow, shotgun and air gun scopes to binoculars, spotting scopes and accessories. Accuracy, strength and precision; Hawke optics blend iconic design, exceptional engineering and unrivalled craftsmanship to create an unforgettable viewing experience. As awareness of Hawke Sport Optics continues to grow, more customers are trusting Hawke as the unquestioned industry leader in optics. Learn more at www.hawkeoptics.com.
