FAST AND FRIENDLY BRASS 5.56 BRASS QUALIFIER SEPARATES THE GOOD FROM THE BAD This Tool Takes a Tedious Job and Automates it for Increased Volume and Faster Production

Farmington, MO - [Fast and Friendly Brass](#), a premier brand in tooling and processing equipment and supplies for optimal efficiency in brass loading and reloading, is proud to offer the 5.56 Brass Qualifier, a machine designed to speed up processing and reloading 5.56 ammo.

“Every commercial brass processor and reloader knows that sorting good 5.56 brass from bad is the absolute worst part of the job.” said Bill Birmingham, Owner of Fast and Friendly Brass. “It is mind-numbing work that can be hard on the hands and even harder on the eyes. Our machine automates this job, reducing the time it takes to get good brass ready for loading and speeding up the production. It also cuts costs and provides uniform quality of brass.”

The Fast & Friendly 5.56 Brass Qualifier can be tuned to allow or disallow any diameter neck size, depending on how tolerant your press or other equipment is to misshapen brass. This machine automatically rejects blanks, cases with crushed necks, and live ammo. The design of this machine ensures that the brass being fed into your presses or other equipment won't break your equipment. The Qualifier will not check for case dents, nor will it sort by headstamp. How fast is it? A single Fast & Friendly 5.56 Brass Qualifying machine can check up to 12,000 cases per hour, limited only by collator speed. For the best results, we suggest pairing the Brass Qualifier with the Fast & Friendly Brass Collator, giving you the ability to produce at higher volumes. For more information, go to fastandfriendlybrass.com.

About Fast and Friendly Brass

Fast and Friendly Brass is owned in whole by Bill Birmingham of Farmington, MO. The company started out processing and selling brass in the St. Louis area starting in 2012 and nationally in 2014. In late 2015 Fast and Friendly Brass stopped processing brass to focus on a bigger need in the market - better tooling and equipment to improve the efficiency of reloading and brass processing. Since then, the company has become an industry leader in high-quality products to make reloading more precise and efficient. Learn more at fastandfriendlybrass.com.
