

TOP-TIER SOLUTIONS GROUP LAUNCHES QUICK DRAW™ RETRACTABLE SINGLE-POINT SLING

Innovative Firearm Sling Engineered for Faster Transitions, Superior Weapon Control, and Mission-Ready Performance

Moorpark, Calif. — [Top-Tier Solutions Group](#) is proud to introduce the [Quick Draw™ Retractable Single-Point Sling](#), an innovative weapon retention system designed to meet the demands of today's law enforcement officers, military personnel, and tactical professionals.

Built around a unique retractable design, the Quick Draw Single-Point Sling delivers the freedom of movement operators need while helping maintain control of their weapon. In fact, as the shooter moves, the retractor automatically manages excess sling slack, keeping the firearm closer to the body without limiting mobility.

During critical weapon transitions, the Quick Draw Single-Point Sling allows the firearm to move naturally while helping reduce the uncontrolled swinging commonly found with traditional single-point slings.

Compatible with tactical rifles and carbines, the Quick Draw Single-Point Sling is available with Quick Disconnect (QD) and triglide mounting options, allowing seamless integration with a variety of weapon configurations and existing equipment.

Beyond mobility, the retractable system provides consistent sling tension that helps stabilize the firearm while engaging targets. Whether standing, moving, or shooting from unconventional positions, shooters benefit from enhanced weapon support and improved control.

Features

- Innovative retractable single-point sling system
- Designed for law enforcement, military, and tactical professionals
- Compatible with tactical rifles and carbines
- Available with QD and triglide attachment configurations
- Automatically manages excess sling slack
- Promotes smoother primary-to-secondary weapon transitions
- Helps reduce unwanted firearm movement during mobility
- Provides added stability while shooting
- Rugged construction built for operational environments

"Every piece of equipment should give the shooter an advantage without adding complexity," said Ben Middleton of Top-Tier Solutions Group. "The Quick Draw was developed to improve weapon handling, enhance mobility, and provide greater control when it matters most."

The Quick Draw Retractable Single-Point Sling represents the next evolution in tactical sling design, combining streamlined weapon retention, unrestricted movement, and enhanced shooting stability in one mission-ready system.

The Quick Draw is available now through Top-Tier Solutions Group and authorized dealers.
