GET ON TARGET WITH THE INSTINCTIVE NEW HAWKE® OPTICS FRONTIER PRISM SIGHT

Because the Best Prism Sight is the One You Don't Have to Think About

Hawke® Optics, a global leader in precision sporting optics, knows what shooters want from a prism sight. It needs to be clear, precise, and adaptive because the last thing you want is to have to search for the dot when you go to shoot. The new Frontier Prism Sights are compact and dependable, making your shooting instinctive. You don't have to think about anything but the shot.

The new Frontier Prism Sights deliver super-fast and dead-on target acquisition. Each sight features exposed, snag-free 1/2 MOA adjustment clicks that won't catch when you bring your firearm up. They have a Mini ACOG footprint, so they integrate easily with a variety of setups. Adaptability is enhanced by the included low-profile Picatinny base and lower 1/3 co-witness riser, letting you mount the sight to best suit your line of sight. The goal is to make a clear path from the dot to the target, without any guesswork.

The Frontier Prism sight comes in your choice of two reticles: the standard PR2 Dot (5 MOA) or the Hawke PR2 Circle Dot (3 MOA). The PR2 Dot offers a clean, precise aiming point, while the PR2 Circle Dot adds a bold horseshoe around the dot for quicker close-range alignment. Both reticles are well suited to AR-pattern rifles. The glass-etched reticle glows when illuminated and stays black when the illumination is off, so you can still use the sight if the battery dies.

Each prism sight is built with premium 25-layer multi-coated optics, enhancing clarity and increasing light transmission. Extra-long 3.9-inch eye relief and a forgiving eye box allow for fast aimpoint acquisition. Ocular focus lets you achieve sharp reticle focus. The Frontier Prism has red or green illumination at the press of a button, with 10 brightness levels that include two night vision settings for use in low- and no-light conditions. Hawke's Auto Illumination Mode (A.I.M.) extends battery life, for up to 50,000 hours of runtime, by placing the illumination on standby until motion is detected.

Ready for any conditions, the sights are nitrogen-purged, waterproof, shockproof, and fog proof. Each sight also comes with protective lens covers and a honeycomb sunshade. The Frontier Prism sight is backed by the Hawke No-Fault Lifetime Warranty for long-term peace of mind. For more information, go to www.hawkeoptics.com.

About Hawke
#VISIONACCOMPLISHED. Hawke is a worldwide market leader at the forefront of optical performance with class-leading innovation and design offering a complete line of sport optics from rifle, crossbow, shotgun, and air gun scopes to binoculars, spotting scopes, and accessories. Accuracy, strength, and precision; Hawke Optics blend iconic design, exceptional engineering, and unrivaled craftsmanship to create an unforgettable viewing experience. As awareness of Hawke Sport Optics continues to grow, more customers are trusting Hawke as the unquestioned industry leader in optics. Learn more at www.hawkeoptics.com.
