GEAR KEEPER® COMBO MOLLE MOUNT GEAR TETHERS ALLOW FOR ENDLESS MOUNTING OPTIONS FOR TACTICAL USERS

Retractors Exhibit Superior Functionality for Attaching Everything from Ammunition and Radios to Canteens and Compasses

Long gone are the days of keeping all your gear on a web belt. The MOLLE platform introduced in the late nineties changed the way tactical vests, body armor carriers, belts and rucksacks were designed giving them the ability to carry more on their exteriors adding convenience and efficiency for the wearer. Utilizing products like the Gear Keeper® Combo MOLLE Mount retractable tethers takes accessibility to the next level providing the ability to keep everything from binoculars to a hydration system at the ready and safe. Use the gear you need and let it go – knowing it will retract back into place and on your person.

The Combo MOLLE Mount minimizes gear movement and features two mounting options in one device. The 360-degree rotating mount, which swivels a full 360 degrees, allows gear to be used at any angle. The full-range rotation also minimizing resistance and line fatigue and ultimately allows you to extend the line at different angles more comfortably. The Velcro strap mount adheres gear securely with the added option of being able to change gear out quickly if needed.

Constructed of stainless steel components, the retractor is built to operate in extreme environments and performs beautifully in the field. Its Spectra/Nylon line is proven to work use after use – in virtually any whether or terrain – and features a patented saltwater proof flushing system that keeps debris out as the line retracts. The compact and integrated system is clean, quiet and secure. A high-impact casing means the device can take repeated knocks, a must-have when crawling, sitting and even running. A patented Q/C Connector System provides for quick and easy connection/disconnection of gear.

Available in three different sizes to fit your needs, the Combo MOLLE Mount comes in 3 oz. retraction force/36" extension; 6 oz. retraction force/36" extension; and 9 oz. retraction force/32" extension.

The original Gear Keeper system was engineered specifically for SCUBA diving literally born out of a need to secure items in situations when hands are otherwise occupied. Gear Keeper systems are now available in more than 3,000 configuration options and used in applications from hunting, fishing and hiking to law enforcement, military and trucking.

For more information about the Gear Keeper Combo MOLLE Mount or other Gear Keeper Products contact Hammerhead Industries, Inc. at 1501 Goodyear Avenue, Ventura, CA 93003 • Phone: (805) 658-9922 • Fax: (805) 658-8833 • Or visit www.gearkeeper.com.
