ONTARIO KNIFE COMPANY® RELEASES LIGHTWEIGHT Ti22 EQUINOX EDC KNIFE

OKC Brings Second Ti22 Knife Designed to be the Ultimate in Multi-Purpose Blades

Ontario Knife Company® (OKC®), the award-winning cutlery maker with over 130 years of experience developing premium knives and tools for every purpose, proudly announces the second knife in their Ti22 series - The Ti22 Equinox. This new folder is perfect as an everyday carry blade for anything from camping and outdoor use up to tactical applications, all while providing the strength and light weight of titanium.

“When we sat back and started designing a perfect folding knife, we wanted premium materials and a blade shape that could function in as many situations as we could dream up,” said David Fenske, Vice President of Ontario Knife Company. “We wanted the strength and light weight of titanium, matched with premium tool steel. The Ti22 Equinox is as functional as it is beautiful.”

The 4.41-inch, liner-lock handle of the Ti22 is completely Titanium and is anodized bronze for a classic look. The 3.03-inch blade is fashioned from S35VN steel with a hardness rating of 58-60HRC. The blade has a tanto design, giving it extra backbone for extremely tough cutting situations. The Ti22 has an extra fine point for delicate cuts, like caping. The handle has a built-in clip making this a perfect EDC knife for any adventure or situation.

Founded in 1889, the Ontario Knife Company® is an award-winning knife, cutlery, and tool manufacturer operating out of Upstate New York for over 125 years. OKC® produces a wide range of tools, including cutlery and kitchenware, hunting and fishing knives, machetes, survival and rescue equipment, science and medical tools, and tactical knives. OKC has a long tradition of building knives and tools for the U.S. military, producing high quality equipment that has seen continuous service since WWII. In addition to being a major supplier to the U.S. Armed Forces, OKC leverages a network of distributors, dealers, and major commercial retailers to sell its products nationwide and internationally to over 35 countries. OKC’s custom manufacturing division Jericho® Tool, advances capabilities including a broad-spectrum of injection molding, tool and die, and machining operations to provide white label and OEM manufacturing services for consumer and industrial goods. Collectively OKC’s product lines and manufacturing services reach the house wares, sporting goods, tactical, security, law enforcement & first responders, education, science & medical, and industrial & agricultural industries.
