HAWKE® OPTICS ADDS THREE NEW RIMFIRE SCOPES TO POPULAR LINE OF VANTAGE 30 WA SCOPES

Explore the Performance of a VANTAGE 30 WA 4-16x50 SF Scope Matched with Hawke's New Rimfire-Specific Reticles and Take Your Plinking to a New Level

Hawke® Optics, a world leader in high quality sporting optics with outstanding performance in the field at amazing value to consumers, happily announces three new rimfire-specific models in the Vantage 30 WA line. Hawke matched the value-packed features of the Vantage scope line with the all-new rimfire caliber-specific reticles. The end results are superior accuracy and scopes that are a must-have for any serious rimfire shooter. These exciting new scopes are a solid addition to Hawke's popular rimfire optic line.

Available for .22LR HV, .17HMR, and .22LR Subsonic, Hawke's exclusive rimfire reticles have pre-calculated aim points for each specific caliber. With each scope, you zero while on 16x magnification at 50 yards (100 yards for the .17HMR) and from there, all aim points are pre-calculated with easy-to-read yardage markings etched in the reticle. With these reticles, you will experience outstanding downrange accuracy unlike any other rimfire scope on the market today.

Each Vantage 30 WA SF 4-16X50 Rimfire scope is built on a 30mm mono-tube frame with ¼ MOA exposed and locking turrets and side focus with infinite parallax adjustment. Each scope has 11-layer, fully multi-coated lenses for excellent clarity and is nitrogen purged to be water-, shock- and fog proof. The scopes have a glass-etched reticle with adjustable red and green illumination, letting you select five levels of brightness. Lens covers and a battery are included. These scopes are worry free thanks to the Hawke No-Fault Lifetime Warranty. If you are serious about rimfire, you need a Hawke Vantage 30 WA SF 4-16x50 rimfire scope with either a .22 LR HV, .22 LR Subsonic, or .17 HMR reticle. Learn more on [Hawke's website](#).
