

SEE WELL AND BE SAFE WITH PYRAMEX® CARHARTT® BRASWELL™ READERS

Highly Functional Reader Glasses for the Workplace are a Must Have

If you need glasses to read screens, plans or other small font, be sure to have a pair of Pyramex® Carhartt® Braswell™ Readers with you when you go onsite for work. Because safety always matters – even when reading for short amounts of time, Pyramex has designed a series of reading glasses specifically for the workplace. Constructed with the precision, streamlined design and high quality materials the company is known for, you can trust that your eyes are protected at all times on the jobsite.

Built to be ultra-lightweight and weighing a mere 25 grams, the Carhartt Braswell Readers have a half-frame design, and a bevy of features to provide a customized fit and weightless feel when on your face. Included in these are an adjustable nosepiece constructed of a unique thermoplastic rubber (TPR) and ratcheting temples made with polycarbonate, and temple tips from TPR. These technically designed additions work together to make for a more comfortable fit and the long-lasting durability of the glasses.

More than just a comfortable option with a streamlined design, Carhartt Braswell Readers are built to last and be one of the safest glasses on the market. The hard-wearing frame and lens are made from polycarbonate, a material originally invented for the aerospace industry for its strong, durable and virtually shatter-resistant properties. Lab and field-tested, the glasses are ANSI and CSA rated for high impact.

The Braswell Readers are available in a Black and Tan frame in three variations including +1.5 magnification (CHB1110TR15); +2.0 magnification (CHB1110TR20); and +2.5 magnification (CHB1110TR25).

Pyramex Safety delivers high quality safety products through its innovative and stylish product lines. The company designs and manufactures a variety of personal protective equipment from eye, head, hand, welding, cooling and hearing protection to Hi-Vis work wear, respirators and ergonomic gear. Founded in 1991, the company has more than 2,000 distributors in over 60 countries and is committed to investing countless hours to research, design and testing to ensure Pyramex products meet the highest industry safety standards.
