ADD SERIOUS THUMP WITH PRO-TRACKER® ARCHERY BAD BOYS FOC SLEEVES

Pro-Tracker Archery Makes It Easy to Increase Your Arrow's FOC For Greater Impact on Game

Pro-Tracker® Archery, the highly acclaimed manufacturer of archery equipment for hunting, invites you to check out the Bad Boys, the innovative FOC sleeve that increases your arrow's inertia on impact. There has never been an easier way to make your arrow carry more momentum, giving it added "thump" on impact with game.

"In bowhunting, next to accuracy, momentum is everything when it comes to making a clean, ethical kill shot," said Gary Christensen, owner of Pro-Tracker Archery. "You need to have the broadhead go where you need it to go, and you need it to carry enough speed and inertia on impact to effectively take an animal down the right way. That's what the Bad Boy Sleeves can do - give you the added thump you need."

Available for compound and crossbow hunters, the Bad Boys sleeves come in various weights and colors. This lets you find the right amount to get the accuracy and inertia you need for the distances you are shooting at. FOC is not a new concept. Having a weight-forward arrow helps deliver the most impact on the shot, and helps make for a clean, ethical kill shot. To use the Bad Boys, you simply slide it over the arrow shaft and secure it with the broadhead, or field point for practice. It is designed to use your current 20-30 yard zero, so you add it as needed. Longer shots will only require minor adjustments.

The Pro-Tracker Archery Bad Boys FOC Sleeves come in 62- to 300-grain weight, as well as variety packs to let you dial in what suits you best. There are multiple color options, as well as standard black. These sleeves fit both standard and micro-diameter arrow shafts and include head shrink tubes to adapt to smaller shafts. You can switch sleeves in the field without re-tuning, making it the easiest way to add momentum to your arrow. Sold by the three-pack. For more information, go to the [Pro-Tracker Archery website](#).

Pro-Tracker Archery is based in Rexburg, Idaho and is an award-winning manufacturer of archery hunting products including the Pro-Tracker Recovery System, the revolutionary radio-frequency tracking system that helps hunters retrieve game regardless of the hunting conditions. The company also produces the Bad Boys FOC arrow sleeve that increases an arrow's FOC for deeper, harder impacts, and a full line of Pro-Tracker Archery carbon arrows designed and built to the highest standards of archery performance.
