

TOP-TIER SOLUTIONS GROUP INTRODUCES THE QUICK DRAW™ 68-OUNCE RETRACTION FORCE TWO-POINT SLING

Maximum Retention. Unrestricted Movement. Built for Mission Success.

Moorpark, Calif. — [Top-Tier Solutions Group](http://top-tier-solutions.com) is proud to announce the release of the [Quick Draw™ Two-Point Retractable Sling](http://top-tier-solutions.com/quick-draw). The 68-ounce retraction force sling is engineered to provide superior weapon retention, enhanced control, and uncompromising performance for military, law enforcement, and tactical professionals.

Designed for shooters who require the stability of a traditional two-point sling without the drawbacks of excess webbing, the Quick Draw Two-Point Retractable Sling utilizes a powerful 68-ounce retraction force that automatically manages sling slack while maintaining consistent tension throughout movement.

The Quick Draw retractable sling keeps the rifle secure against the body while allowing the freedom to shoulder the weapon, transition between shoulders, assume unconventional shooting positions, and maneuver through complex environments with confidence.

Compatible with tactical rifles and carbines, the sling is available with Quick Disconnect (QD) mounts, making it adaptable to a wide range of weapon platforms and mission requirements.

Unlike conventional two-point slings that leave excess webbing hanging loose, the Quick Draw continuously retracts unused sling material, reducing snag hazards and keeping the weapon close to the operator until additional length is needed. The 68-ounce retraction force provides firm, consistent tension while still allowing smooth weapon presentation and unrestricted operation.

The retractable design also enhances shooting stability by maintaining controlled sling tension, giving operators additional support for improved weapon control during target engagement.

Key Features

- Innovative two-point retractable sling with a 68-ounce retraction force
- Designed for military and law enforcement
- Compatible with tactical rifles and carbines
- Available with QD mounting configurations
- Helps reduce snag hazards caused by loose sling material
- Keeps the firearm securely positioned during movement
- Provides additional stability through constant sling tension
- Rugged, mission-ready construction built for demanding operational environments

"The Quick Draw was designed to enhance performance over traditional slings," said Ben Middleton of Top-Tier Solutions Group. "It keeps the weapon under control, providing the freedom of movement professionals need without compromising retention or stability."

The Quick Draw 68 oz Retraction Force Two-Point Sling represents the next evolution in tactical weapon retention, combining innovative retractable technology with rugged construction to give military personnel, law enforcement officers, and tactical professionals greater confidence and control.

The Quick Draw 68 oz Retraction Force Two-Point Sling is available now at top-tiersolutions.com as well as authorized dealers.
